CONSULTING REALISATION EFFICIENCY

LP 4140

LP 4151

At this pace documents are ready in no time at all.

Medium-sized and large offices are now choosing print partners that are real achievers: the LP 4140 and the LP 4151. These two high speed laser printers with 600 MHz processors and a huge user memory transfer all your required documents from PC to paper in a matter of seconds. Whatever you send to the LP 4140 or the LP 4151 from the office network will be printed at 40 or 51 pages respectively, considerably boosting user productivity – saving you time and money in the process. And of course the high-grade components make for reliable and environmentally friendly machines. The LP 4140 and the LP 4151 also score high points for their range of printing options, from A6R to A3 formats and an optional data security kit. It's not only about simple printing of text and images: these two professional tools are the ideal solution for large-scale printing jobs. The optional finisher extensions help sort, staple, fold and punch holes. Speed is the highlight of the LP 4140 and LP 4151, but their versatility is what makes them indispensable.
